

# Keeping warm and well this winter

## Checklist

### Check the temperature

Are the main rooms in your house heated to at least 21°C with other commonly used rooms kept no less than 18°C?

### Check the heating system?

Is the heating coming on at the right time when you adjust your heating timers?

### Enough oil to last the winter?

If your tank needs topping up, use an accredited member of the UK & Ireland Fuel Distributors Association (UKIFDA) who will follow strict safety regulations.

### Has your boiler been recently serviced?

Make sure your boiler has been serviced by an OFTEC (for oil or solid fuel) or GasSafe (for mains gas or LPG) registered technician to check it is working correctly and efficiently.

### Are you aware of winter payment schemes?

There is support available to help vulnerable households with heating bills over the winter. Visit [www.gov.uk](http://www.gov.uk) to find out more.
