

Withdrawn OFTEC Standards

- OPS 21 – Fire protection screen walls for use with oil storage tanks – Minimum requirements and testing
- OPS 26 – Guidance for use of BS EN 13203-2:2006 for liquid fuel fired combination boilers up to 70kW rated input and with 100 litres hot water storage capacity.
- BLPS 25 – Bio liquid sustainability and environmental standard – for fixed combustion appliances up to 70kW rated output.
- BLPS E22 – Flexible supply lines for liquid fuels
- OFS A100 – Condensing and non-condensing heating boilers with atomising burners outputs up to 70kW maximum operating pressures of 3 Bar
- OFS A101 – Oil fired cookers with atomising or vaporising burners with or without boilers heat outputs up to 45kW
- OFS A102 - Oil fired roomheaters with atomising or vaporising burners with or without boilers heat outputs up to 25kW
- OFS A103 – Used lubricating oil burners for space and water heating appliances heat outputs up to 400kW
- OFS E105 – Overfill alarms and overfill prevention devices – for use with domestic oil supply tanks.
- OFS E106 – Flues for use with oil fired boilers with outputs not above 50kW
